

**HIGH HEAT SITUATIONS CALL FOR
HIGH PERFORMANCE PREP TABLES.**

— Derek Emerson, Chef/Partner,
Walker's Drive-In Restaurant and 463 Local Café

James Beard Nominee,
Best Chef: South

"The Randell 8000N Prep table has eliminated the heat issues I had experienced with other brands. The raised rail design keeps all of the ingredients at the perfect temperature — whether it is across from the pizza oven or on the sauté line. At the end of the shift we shut off the power to the top rail to clean and sanitize, while the bottom of the table stays at temp. The health department loves our prep table almost as much as we do!"

Randell's exclusive mechanically-cooled raised rail 8000N series prep table offers easy access to all food pans while meeting strict food safety pan temperature requirements. **It's the most effective and efficient refrigerated prep table available.**

- **Exclusive cold wall conductive cooling** design transfers cold efficiently through recessed food pans — instead of trying to force cold from the bottom only.
- For food safety precautions, **the raised rail is sealed to the base to prevent spills** from contaminating food stored in the refrigerator below. And only Randell's raised rail has a **standard oversized rail drain** to easily drain water and debris from inside the rail.
- An **independent rail thermostat** allows adjustment of the base and rail temperatures separately.
- **Side-mounted compressor** is cooled without exhausting hot air through the back or side of the unit. This exclusive design enables the compressor to run 25° cooler, and you can build the unit in with zero clearance or curb-mount it.
